Whether you're into deep snow, backcountry or trail riding, staying warm and dry is essential. It's all about layering; a science we've perfected.

Build your perfect combination of base, mid and outer layers with our easy-to-understand rating system to help you dial in the perfect balance of comfort and performance for you.

**AT THE CORE OF EVERYTHING.**

**01 BASE LAYERS**
It all starts here; it's essential to stay dry, to stay warm. Base layers wick away moisture from perspiration against your skin, the first crucial step in preserving warmth.

P.38

**COMFORT THAT ADJUSTS WITH YOU.**

**02 MID LAYERS**
Using a mid layer allows you to adjust your ideal warmth level. Winter weather is notoriously variable. Stay ahead of the game, stay comfortable.

P.36-37

**YOUR FIRST LINE OF DEFENSE.**

**03 OUTER LAYERS**
Keep out the elements and hold in the warmth. We offer outer layers engineered with the highest performance materials like Sympatex, PrimaLoft and RPM technologies to match your riding style and needs.

- Measure body in underwear.
- Tape must be snug but not tight.
- If measurements fall between two sizes, order the larger size.

Height: Without shoes, standing with heels and back against a wall.

Head: Around your head, from the center of the forehead, above the ears and over the natural bump at the back of the head.

Arm length: Let the hands hang down on the side in a slightly bent position. Measure from the center of the back of your neck, along the length of your arm, to the wrist.

Chest/Bust: Measure under your arm, around the fullest part of your chest.

Waist: Measure around your waist at the narrowest place.

Hips: Across the fullest part of the seat.

Inseam: Without shoes, from crotch to the floor.

Gloves: Measure palm width.

Boots: Foot length from heel to toe.

WHAT CODE REPRESENTS YOUR SIZE?

1. Find your size.
2. The corresponding code is THE CODE you use to complete the part number on your order.

SLIDERS WITH VESPEL® INSERTS

- Uses DuPont Vespel inserts for less friction.
- Can be cut to desired length.
- Better fuel efficiency, more power and increased vehicle speed, due to reduced friction between the track clips and slides.
- Reduced need for maintenance and associated costs.
- Extended life due to enhanced wear characteristics of Vespel polyamide over incumbent UHMW PE.
- Allows riders to operate sleds in less than acceptable snow and trail conditions since water from snow is not needed for lubricity as with incumbent UHMW PE slide rails.

SLIDER SHOES

- Custom color-matched slider shoes with built-in wear marker.
- Long-lasting, impact-resistant.
- For all slide rail lengths.
- Easy-cut to desired length.

LIGHTWEIGHT WHEELS

- Color-matched lightweight snowmobile wheels.

NSK®

- High performance grease developed for extreme temperatures, water resistance and high speeds with low start torque.
- Advanced Winter Grade DUL1 double-contact seal design for optimum protection from moisture and contamination.
- Polyamide resin ball-guide cage facilitates smooth rolling contact and lubricant distribution.
- Ultra-clean steel for extended bearing life - high-grade balls for quiet and smooth operation even at high speed.
- Super finished raceways to minimize noise and improve lubricant distribution and life.

EXTRA IDLER WHEEL KIT

- Reduces drag and rolling resistance.
- Includes 2 wheels, brackets and hardware.

4TH REAR WHEEL KIT†

- 4th rear idler design reduces drag and rolling resistance.
- Works in conjunction with stock 3 wheel setup.

Note: Please contact your nearest dealer for suggested retail prices of these products.
**YOUR CONNECTION TO THE SNOW**

**POWDER MAX LIGHT**
- 3.5" (8.89 cm) pitch reduces weight, and keeps snow between lugs for added performance.
- Exclusive 16" (41 cm) wide design adds flotation and traction without sacrificing manoeuvrability.
- Edges flex to reduce the effort to initiate roll-up.
- Available in either 2.5" or 3.0" (6.3 or 7.62 cm) lug heights.

**POWDER MAX 3 / FLEXEDGE**
- The track edges bend, making roll-up easy and predictable.
- Exclusive FlexEdge technology available in Powder Max, Powder Max 2 & 3 and Cobra 1.6 profiles.

* Not compatible with REV Gen4*
To install the studs, always use the installation tools, procedures and torque specified in the instructions. Proper installation provides maximum product longevity and helps prevent track damage. BRP recommends that studs be installed by authorized BRP dealers, and on approved pre-patterned tracks only. These tracks come standard on most 2020 Ski-Doo snowmobiles. Look for this symbol on your track. Woody’s products are designed to fit and interact with each other. The stud nut and support plate form a complete unit. The use of aggressive skis, ski carbide runners or studs will alter the handling of your snowmobile, particularly in terms of manoeuvrability, acceleration and braking. Please refer to your Operators Guide for more details.
