THE PULSE OF SKI-DOO 2021

MEET OUR SKI-DOO BRAND AMBASSADORS

We're proud to partner with some of the most passionate riders you'll ever meet. Many of the products in this catalog have been influenced by professional and everyday riders alike. That's why, this year, three everyday riders from around the world joined our knowledgeable brand ambassadors behind the scenes and in front of the camera. Sanna Kvist of Sweden, Ross Lara of Colorado and Matt Doestch of Ontario all proved they live That Ski-Doo Feeling to the fullest, winning the trip of a lifetime.

See a glimpse of their experience all throughout this catalog and be sure to follow our team of riders on social media to stay close to the pulse of Ski-Doo.

TECHNOLOGIES

OUR RIDING GEAR AND TECHNICAL WEAR ARE BUILT WITH ADVANCED TECHNOLOGIES THAT PROTECT YOU WITH WARMTH, WATERPROOFNESS, LIGHTWEIGHT AND BREATHABILITY.

PRIMALOFT®

A high-performance insulation with the full spectrum of benefits to brave the elements. Warmer, drier, softer and more compressible than any other synthetic insulation.

RPM/RPM MAX

Coatings that provide maximum waterproofness, windproofness and breathability.

RPM Max:

**All seams
& logos sealed**

RPM:

**Critical seams
& logos sealed**

eLinQ CONNECTOR SYSTEM

All of our jackets (except shells) have provisions built in for a heated shield wire - riders can leave the wire in the jacket securely fastened and out of the way.

YKK

We use the world's best - YKK zippers - recognized for quality and reliability.

CORDURA®

Often added to garment zones that need extra durability, such as arms, back hem, inner legs, and crotch for tough yet flexible comfort.

TEFLON DWR®

More than an ordinary DWR (Durable Water Repellent) - the Teflon DWR used on Ski-Doo gear repels water, oil and dirt to keep riders dry and protect against stains.

**DYNAMIC
BREATHABILITY**

In addition to being windproof and having superior waterproof performance, Sympatex adjusts to your body's temperature by letting more moisture pass through as needed—dynamic breathability—something a porous PTFE membrane cannot do. Sympatex also doesn't clog, or stretch out like PTFE. It's time to move it up a level with Sympatex.

SKIS

Skis make all the difference in getting your sled to handle just how you like. We offer eight different styles of skis for you to choose from. Which one is right for you? Here's some tips on choosing the right one:

PLATFORMS: REV GEN4 / XP / XR / XU / XS / XM / REV	TOURING			Pilot 5.7 SL 2 carbides/ski	<ul style="list-style-type: none"> • Lightweight single or dual runner skis provide effortless steering at low speeds and constant grip without compromise at higher speeds. • Standard use is one carbide runner - add a second to reduce darting. • Great all around trail performance.
	UTILITY			Pilot 7.4 1 carbide/ski	<ul style="list-style-type: none"> • Specifically designed for utility purpose. • Deeper keels allowing more control while towing. • Increased tip-up rear end for better reverse capability. • 1 inch wider than Pilot DS-2 for improved flotation in deep snow. • More aggressive cornering while keeping a light steering feeling.
	TRAIL SPORT			Pilot 5.7 1 or 2 carbides/ski****	<ul style="list-style-type: none"> • Lightweight single or dual runner skis provide effortless steering at low speeds and constant grip without compromise at higher speeds. • Standard use is one carbide runner - add a second to reduce darting. • Great all around trail performance.
				Pilot TS Adjustable 1 carbide/ski	<ul style="list-style-type: none"> • The industry's first and only adjustable ski. • The Pilot TS skis allow riders to change ski bite for changing snow conditions or riding styles easily and quickly. • With the Pilot TS skis you dial in the perfect setting by turning a knob on the ski leg. • The ski runner has 1/2" (12.5 mm) of travel up and down. • The thin runner and square keel design work together to eliminate darting.
	TRAIL PERFORMANCE			Pilot R 1 carbide/ski	<ul style="list-style-type: none"> • Straight from the MXZ X 600RS race sled. • Very aggressive profile for sharp handling. • Lightweight with high rigidity. • Proven on the ISOC race circuit.
	DEEP SNOW			Pilot DS** 1 carbide/ski	<ul style="list-style-type: none"> • Designed specifically for deep snow riding. • Works well in many off trail applications from utility sleds to mountain. • Thin edge is effective for grabbing side hills.
				Pilot DS-2 1 carbide/ski	<ul style="list-style-type: none"> • Evolution of the DS with a deeper and shorter keel. • Increased agility and less effort than the original. • Standard on mountain sleds with 2.5" lug tracks and utility sleds. • Great all around ski for deep snow use.
				Pilot DS-3** 1 carbide/ski	<ul style="list-style-type: none"> • Deep snow ski designed to match the latest 3" lug and longer tracks. • 0.47" (12 mm) deeper keel than DS-2.
				Pilot DS-3 REV Gen4*** 1 carbide/ski	<ul style="list-style-type: none"> • Works well for aggressive riders using the biggest tracks.

Do not fit REV Gen4. *Fits only REV Gen4. ****Second carbide can be added to ski by drilling marked additional holes.

Note: The use of aggressive skis, ski carbide runners or studs will alter the handling of your snowmobile, particularly in terms of manoeuvrability, acceleration and braking. Please refer to your Operators Guide for more details.

SLIDERS WITH VESPEL[†] INSERTS

- Uses DuPont Vespel inserts for less friction.
- Can be cut to desired length.
- Better fuel efficiency, more power and increased vehicle speed, due to reduced friction between the track clips and slides.
- Reduced need for maintenance and associated costs.
- Extended life due to enhanced wear characteristics of Vespel polyamide over incumbent UHMW PE.
- Allows riders to operate sleds in less than acceptable snow and trail conditions since water from snow is not needed for lubricity as with incumbent UHMW PE slide rails.

WARNING
Install APPROVED
studs in marked
locations ONLY

To install the studs, always use the installation tools, procedures and torque specified in the instructions. Proper installation provides maximum product longevity and helps prevent track damage. BRP recommends that studs be installed by authorized BRP dealers, and on approved pre-patterned tracks only. These tracks come standard on most 2021 Ski-Doo snowmobiles. Look for this symbol on your track. Woody's products are designed to fit and interact with each other. The stud nut and support plate form a complete unit. The use of aggressive skis, ski carbide runners or studs will alter the handling of your snowmobile, particularly in terms of manoeuvrability, acceleration and braking. Please refer to your Operators Guide for more details.
